

Cooking for Adventure

Next time when in the great outdoors, bring easy cooking, versatility and portable reliability to feed and satisfy your next adventure.

The amazing portable DreamPot is a "self-contained" cooking appliance which is portable, easy to use and only takes minutes.

Fancy cooking all your meals with minimal heat, energy or effort – but have maximum versatility as to when you wish to eat during any part of the day when travelling?

Who can go past a good old fashioned corned beef & vegetables (with white sauce of course!). But cooking this type of meal while travelling and camping is near impossible due to the lengthy cooking times and the need for a constant source of heat.

The answer? DreamPot!

DreamPot is the ultimate portable cooking solution for those of us who love being out and about.

A miracle cooking appliance, this unit practically uses no power or heat to cook your meals and then it stay hot all day long to enjoy while caravanning, camping, boating, fishing or four-wheel driving.

The versatility of the DreamPot thermal cooker allows you to prepare meals that you would traditionally only create at home and using the ongoing power source of an electric slow cooker. The DreamPot is also a rice cooker, roast maker, yoghurt maker, cooler (perfect for bottles of wine or soft drinks), a Bain Marie and even a bread maker!

DreamPot cooking takes only a short time to prepare – you don't have to wait around during or supervise the actual cooking process, allowing you complete freedom to do other things!

With one of these little beauties, meal planning and meal options whilst on the road never need to be boring again. The best part is the ability to cook 2 meals at the same time; one in the bottom inner saucepan and another in the top inner saucepan. So now cooking a chunky home-style soup and a damper at the same time with little fuss, minimal heat and little supervision is an easy option for you to enjoy at the end of a busy day.

The DreamPot works similar to a thermal style flask, using only the highest grade insulation to retain the initial heat of the inner saucepans allowing a perfect and even cooking process to happen. The result: tender and tasty meats every time!

Visit the link to learn more about how it works.

Both inner cooking saucepans are made from sturdy stainless steel with heavy bases; ideal for induction tops! The DreamPot outer unit itself is a rugged design with a robust ABS plastic carry handle and lid with a secure latch.

DreamPot is a very well-constructed unit that's been designed for the traveller or for people on the go.

Includes 5 year warranty, Customer service and recipe assistance 1800 636 073 hotline - 7 days a week.

Unbeatable versatility, performance, reliability and durability!

Incredibly shortened cooking time process and saving you approximately 80% of your energy costs!

Take your DreamPot anywhere and cook anytime! Ergonomically designed for stability, especially when travelling!

Absolutely non-electrical and cordless, which means a safe cooking experience every time! DreamPot meals are wonderfully delicious, nutritious and healthy. Sensational flavours!

Multi-functional 6 in 1 appliances. It's a thermal cooker, rice cooker, bread maker, yoghurt maker, barbeque / bain marie and ice cooler. Just so versatile!

Designed to take the hard knocks on travels – portable and confident cooking on the move, wherever you go!

DreamPot thermal cooking eliminates the need for a constant fuel or power source: making cooking while you travel or at home hassle-free and easier than ever before!

Discover the DreamPot difference. Save on energy costs. Save time supervising your meal. With its purpose-built design for cooking performance and durability, the DreamPot is incredibly energy efficient and a miracle cooking experience. The DreamPot comes complete with one or two 18/8 stainless steel inner pots with heavy sandwich base, strong handles and 18/8 stainless lids with food grade knobs.
