

## Imagine Surf

Imagine this...  
The sun is shining, the crystal clear river beneath you flows calmly, pulling you along. The serenity of this perfectly isolated part of the world embraces you. As you paddle calmly around a bend, your eyes gain focus on something in the distance. Bubbling white water appears in front of you not 50 metres from where you stand atop your board. Your adrenaline kicks in, and you begin to mentally prepare for what lies ahead. You prepare your body with a roll of the shoulders, and a stretch of the neck.

As you paddle towards the rapids that are readily waiting your arrival like a mother with open arms, you know from that point you have the skills, and trust your equipment is going to pull you through to the other end in one piece. You know this because you are confidently paddling an Imagine Surf Rapidfire Inflatable Stand-Up Paddleboard.

Imagine Surf products are second to none. If you are going to take on the challenge of running rivers, creeks or oceans on a SUP, then you choose the right equipment. All of their Inflatable SUPs have one thing in common. They have all been developed and tested by a crew of the best White Water SUP paddlers in the world.

They boast clever built-in design features that make Imagine Surf's boards the best option for anything stand up. From the double skin DLX construction that provides durability and rigidity, multipole grab handles located on all areas of the board, to the cargo bungees or the kick up skeg that prevents you getting snagged in shallow waters, Imagine Surf have thought of everything.

At 9'6" x 36" x 6" the Rapidfire is built with progressive rocker and outline providing manoeuvrability and stability to allow you to make the moves needed to negotiate down a technical section of river.

The 11ft Inflatable Angler board has a universal accessory mount so you can mount your GPS, Fish-finder, or Action Cam. You can even rig a windsurf sail to get you to your destination in a breeze. It also comes with fishing rod holders and stake-out loops so you can drop an anchor and bring home dinner. The 10' x 37" x 6" Inferno is a board designed for on water Yoga and Fitness. SUP'ing can be great for core workouts and endurance conditioning; this board takes it to the next level.

The Icon is a great all-rounder and the DLX Windsurf model option includes all the premium features of the Icon DLX but you also get a mounting plate used to fasten the Imagine Surf windsurf base.

Their Connector & Mission models have options available to them like snap in Surf or Race fins, and are the perfect board for entry level or next level advanced boarders.

Imagine Surf began in 2006, started by a handful of surfers and paddlers, and their product philosophy is simple. They build boards they want to paddle. Imagine Surf is one of the most fun, authentic, and exciting paddleboard brands on the market.
